OUR STORY

- Jan 2022, we knew we wanted to build an impactful DeFi product, but did not know what people wanted

- To figure that, we inverted the arrow of building in DeFi
  - Leveraged the NFT craze, built an innovative NFT series that appealed to DeFi users
  - Created a community of like-minded people in Shrub Discord

- Through interviews with them built relationships
  - 55 super users who have interacted with our contracts over 35 times each
  - 9000+ tx done by over 2000 people

- With these relationships gained insights to build Shrub Lend
  - Iterated over various ideas until we discovered the need that we are addressing with Shrub Lend
  - We learnt what users are thinking, want and care and used it to nucleate Shrub Lend

Thank you

Shrub
